PROFESSIONAL SUMMARY

Enthusiastic and detail-oriented computer science graduate eager to apply practical knowledge of software design and database management. Seeking a challenging entry-level opportunity to contribute to innovative software products while rapidly expanding my technical skill set.

TECHNICAL SKILLS

Frontend	HTML, CSS, JavaScript, React.js, Bootstrap
Backend	Java, Spring Boot, RESTful APIs
Database	MySQL, SQL
Tools & IDEs	Git, GitHub, Postman, VS Code, Eclipse IDE, Jira
Deployment	Vercel

PROJECTS

Online Movie Ticket Booking System

Skills: Java, Spring Boot, React.js, HTML, CSS, MySQL

Frontend GitHub: github.com/sakshi-khangar/Cinebok-Frontend

Backend GitHub: github.com/sakshi-khangar/Cinebok--Backend

- Developed a full-stack Movie Ticket Booking System with React.js frontend and Spring Boot backend
- Created RESTful APIs for core features, including movie listing, seat selection, and booking management
- Built an interactive seat selection UI in React.
- Designed MySQL database tables to store movie, user, and booking data; wrote SQL queries for data retrieval
- Connected the React frontend to Spring Boot APIs and tested all API responses using Postman
- Designed a clean, responsive UI allowing users to browse movies, select seats, and confirm bookings
- Used Git for version control and collaborative code management throughout development

Image Search App

Skills: HTML, CSS, JavaScript, REST API

GitHub: github.com/sakshi-khangar/Image-Search-App

- Built a responsive Image Search Application using HTML, CSS, and JavaScript
- Used a third-party image API to fetch and display search results dynamically based on user input
- Added a 'Show More' button to load additional results, implementing pagination in a web application
- Practised DOM manipulation to dynamically update the page without reloading
- Gained hands-on understanding of how APIs work and how to handle JSON responses in JavaScript

React Weather Application

Skills: React.js, HTML, CSS, JavaScript, Weather API

GitHub: github.com/sakshi-khangar/React-Weather-Application

- Developed a responsive weather application using React.js with a simple and user-friendly interface
- Integrated a third-party Weather API to fetch and display real-time weather information dynamically based on user search input
- Implemented React Hooks (useState) for managing application state and rendering weather data efficiently
- Added error handling to manage invalid city input and unsuccessful API responses
- Displayed weather details including city name, temperature, and current weather conditions through dynamic UI updates
- Designed responsive layouts to provide a seamless experience across different screen sizes

EDUCATION

Priyadarshini College of Engineering, Nagpur

Computer Technology || **72.60%**

Bhartiya Krishi Vidyalaya & Jr. College, Nagpur

Class XII || **88.67%**

Ashirwad English High School, Nagpur

Class X || **72.60%**

CERTIFICATIONS

- Completed SQL and Relational Databases 101 certification by IBM
- Completed Java Essentials Certification from I.T. VEDANT
- Completed Web Development using HTML by IBM Skills Network
